

September 10, 2020

This folder contains replication files for “Aggregate effects from public works: Evidence from India” by Justin Cook and Manisha Shah. All analysis was done in Stata 16 (unless specified otherwise). To summarize:

1. The dta file “district light panel” contains our annual district panel of average nighttime lights for 2000-2013.
2. The dta file “district deposit panel” contains our quarterly district panel of deposits for 2004-2013.
3. The do-file “light tables” recreates all estimations in the paper and appendix from our nighttime light panel.
4. The do-file “deposit tables” recreates all estimations in the paper and appendix from our deposit panel.
5. The do-file “light figures” recreates all figures and sub-figures in the paper and appendix from our nighttime light panel.
6. The do-file “deposit figures” recreates all figures and sub-figures in the paper and appendix from our deposit panel.
7. The do-file “spatial se” estimates spatially adjusted standard errors from Table 1.
8. Raw data and cleaning folder:
 - a. “lights panel build” creates our base nighttime lights panel from underlying data.
 - b. “deposit panel build” creates our base deposit panel from underlying data.
 - c. “nregs build” creates the district indicator that turns on when a district starts receiving NREGS funding.
9. Raw lights data folder:
 - a. Contains shapefile documents used in aggregation and yearly district aggregations for night lights data cited in paper.
 - b. These data were created by taking the mean (and sum) from the Zonal Statistics as Table command in ArcGIS Desktop.
 - c. Nightlight rasters can be found at <https://ngdc.noaa.gov/eog/dmsp/downloadV4composites.html>.
